PRIMARY EXAMINER

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination, fails to anticipate or render obvious, the method of forming silicon-on-insulator including the limitations of forming a first silicon dioxide-comprising region in contact with the silicon-comprising layer, a silicon nitride-comprising region in contact with the first silicon dioxide-comprising region, a second silicon dioxide-comprising region in contact with the silicon nitride-comprising region, the silicon nitride-comprising region being received intermediate the first and second silicon dioxide-comprising regions, forming a pair of source/drain regions in the silicon-comprising layer, each of the source/drain regions extending to the insulator layer; and forming a channel region in the silicon-comprising layer, the channel region extending less than completely through a thickness of the silicon-comprising layer, the silicon nitride-comprising region running along only a portion of the channel region in combination with the other limitations of claims 49 and 62.

Claims 50-54 and 57-59 are rejoined for being dependent on an allowable generic or linking claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
